when you are logged in the first entry will disappear (register user/create account)

Important notice: to date VERSUS AUDIO's libraries only work in NI's Kontakt!
In the free Kontakt Player they will only support demo mode for 15 minutes!

your account nickname (self-chosen)

your name

and given name

email address

password (self-chosen,7-20 characters)

password confirmation

privacy policy checkbox (and link)

submit button

The Registration Process:

Fill out the form with the required data (see screenshot), check the box for accepting the privacy policy and click the button below.
You will receive a confirmation email.

The Purchase Process:

Click on the VERSUS AUDIO logo at the top left or navigate the
INSTRUMENTS menu to access the product page of your choice

Click on the button above the price-tag (= "add to cart").
If you are logged-in the cart will open. If not the login page will appear.

2019 by Burger/Sugahara/DAW Food for versus audio

If you already set up a user account enter your credentials and click the **LOGIN** button to the right. If not, click the **Register** button above to create a new account (see p. 2)

When you open the cart - where you can add several products at once - you can see the respective items and can choose to order up to 10 serial numbers/registration keys via the drop-down menu or delete an entry with the button at the far right of each row.

Click on the button below the table (= "continue purchase process"). You will see an order summary, the purchase contract with VERSUS AUDIO, and clicking at the bottom right button will take you to **paypal**

VERSUS AUDIO

After the payment is settled with paypal - which can take a few minutes - you will receive an order confirmation for your purchase and a separate email with the registration keys/serial numbers for each of the products purchased. (see p. 6)

この度は Versus Audio をご利用いただきまして、誠にありがとうございます。
ご購入製品のライセンスの発行が完了致しました。

The Download Area:

In the downloads area you find all your registered products and free products as separate downloads with samples in 44kHz and 96kHz resolution (where both are available).

Updated products are clearly marked in blue with the date of release.

With version numbers provided you can decide if you want to download the update patches only, or choose to select the full download.

Whichever you choose clicking the button („download") to the right starts the fetching process.

This also applies to the User Guides provided for all the products
